

BCT SERIES BROADCAST TRIPODS

Professional broadcasting tripods for perfect filming

The tripods feature a permanent 75mm or 100mm half bowl.

The centre and floor spreaders are removable and individually adjustable.

The large aluminium screws are particularly useful, ensuring sure and quick manipulation.

The lower sections of the legs are made of one tube and the upper sections of two. This increases stability and reduces the likelihood of vibration.

When working without the spreader and on soft surfaces, the double spikes can be covered with stable rubber feet [included].

- Professional video tripods – comfortable, sturdy and strong
- Lightweight aluminium or very lightweight 10 layers carbon
- Centre and floor spreader, 3 rubber feet, tripod bag, strap

- Carbon
- Aluminium

simply innovative.
