

# ET SERIES EASY TRAVELER

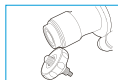

Travel tripods – compact, comfortable, lightweight, sturdy

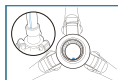

- Travel tripods with small pack size and large working height
- Included short centre column (9.5 cm) for ground-level shots
- Foam rubber leg wraps, stabilising hook, 2nd centre column

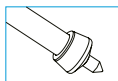

The **legs** can be fully folded up from **0-180°**, reducing the size and completely enclosing the head. Three solid ratchet steps allow flexible use.

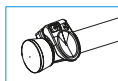

Detachable head support plate with mounting **screw** quickly switches from **1/4"** to **3/8"**.

The height of the **centre column** is adjustable and it is reversible. Switching to the **short centre column** makes all shooting positions possible.

The tripods are stable and will not slip on **rubber feet**. The **ET2** also have twist-out **metal spikes**, intended for use on soft and uneven surfaces.

Sealed **clip locks** for quick and easy use. The practical clip locks open quickly and the leg section extends quickly.

- Carbon
- Aluminium

simply reliable.
