

LE SERIES

LE-60 levelling head – simply and perfectly balanced

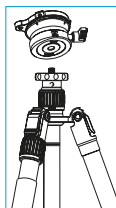

60mm half ball that tilts to all sides by 0°–15° and locks.

Three fixing screws for tripod head.

For heads, cameras, etc. with **1/4"** or **3/8"** connection (Adapter included).

Being very **compact** and **flat** the LE-60 achieves more stability than trying to level using other means such as a ball head.

Precise **alignment** of the **horizontal plane**.

- For alignment of tripod heads, video, ball, panoramic heads
- **Flat** and **compact** design – high stability
- Milled of best quality aircraft **aluminium** High-End CNC
- Built-in **spirit level** for exactly adjustment
- All-round **15°** inclination
- **3/8"** tripod connection, **1/4"** head connection
- **3 locking screws** prevent the tripod head from rotating

simply better.
